

**110. Would you feel uncomfortable discussing or criticizing the performance of the Edison Financial component to date? Please explain:**

**Wave 1**

None.

**Wave 2**

1. This office does not do a lot of the Edison functions. You should ask someone who does this every day.
2. I do not like to be perceived as a negative person.
3. Too much has been invested in a flawed project. Defense of the project points most frequently to users not the designers.

**Wave 3**

1. It is encouraged in our department to be positive about this project.
